

November 16, 1943

Mr. Walter L. Russell  
McKinnon, Wyoming

Dear Mr. Russell: RE: BURNT FORK DISTRIBUTION

Mr. Monson of this office has reported, after a meeting with you on November 12, 1943, that the plats or maps of the irrigated areas showing the location of the irrigation canals and ditches and the irrigated areas in Utah would be completed within the next two weeks. The list of water rights should also be submitted with the maps the committee is preparing.

The fact that this matter has been under consideration since August, 1942, prompts me to urge you to complete the preparation of this data as soon as possible.

The weather permitting, Mr. Monson will be in Burnt Fork on November 30.

A meeting with the Wyoming Water Commissioner is being held on December 1, 1943, at Green River, Wyoming.

Yours very truly,

Ed. H. Watson  
STATE ENGINEER
